The internet is a worldwide system of computer networks. It was known in 1969. The original aim was to create a network that would allow users of a research computer at a university to research computers at other universities. Today, it is used by hundreds of millions of people worldwide for many different purposes. We all know that it is a very useful tool. But most of us take the internet for granted and forget just how important it is to our daily lives. Have you ever thought about what life was like before we had the internet? Years before the internet became common to everyone, it took about a week to send a letter from one country to another. But now, it takes just a few seconds to send a message through an e-mail.

Information was also very difficult to find. People had to spend a lot of time at libraries just to find the information they were looking for. But thanks to the internet, we can now find the information we need just by clicking a mouse.
